# SUMMARY OF EXTENSION INFLUENCE

The 1940 reports of county extension agents indicate that organized extension programs were conducted in 83.7 percent of all rural communities and that 5,741,615 rural families were definitely influenced by some phase of the extension program. Of this number 4,791,433 were farm families and 950,182 were other families. Changes in practices resulted from the agricultural extension program on 3,802,114 farms. The home-economics extension program influenced the adoption of improved practices in 1,698,577 farm homes and in 567,456 other homes. The 1,420,297 4-H Club members came from 860,019 farm homes and from 217,277 other homes. The number of farm families definitely influenced by some phase of the 1940 extension program equals 71.3 percent of all farm families listed in the 1930 Census<sup>1/</sup>.

# EXTENSION AGENTS EMPLOYED AND REPORTING

Cooperative extension work in 1940 was carried on by 6,796 county extension agents and assistants, assisted by 1,370 full-time and 346 part-time subject-matter specialists.

\* Work of assistant agricultural agents and assistant home demonstration agents included in reports of the agents in charge of these lines of work in the counties.

\*\* Club agents were appointed in new counties after June 30. In some instances assistant county agricultural agents primarily responsible for 4-H Club work reported as county club agents.

Extension work with adults claimed 71.5 percent of the time of all county workers, the remaining 28.5 percent being devoted to 4-H Club and other youth extension. Considering all county workers, 62 percent of the year's time was spent in the field and 38 percent in the office.

## THE EXTENSION PROGRAM

The emphasis placed upon the various farm and home enterprises by county workers and specialists makes it possible to visualize the 1940 extension program.

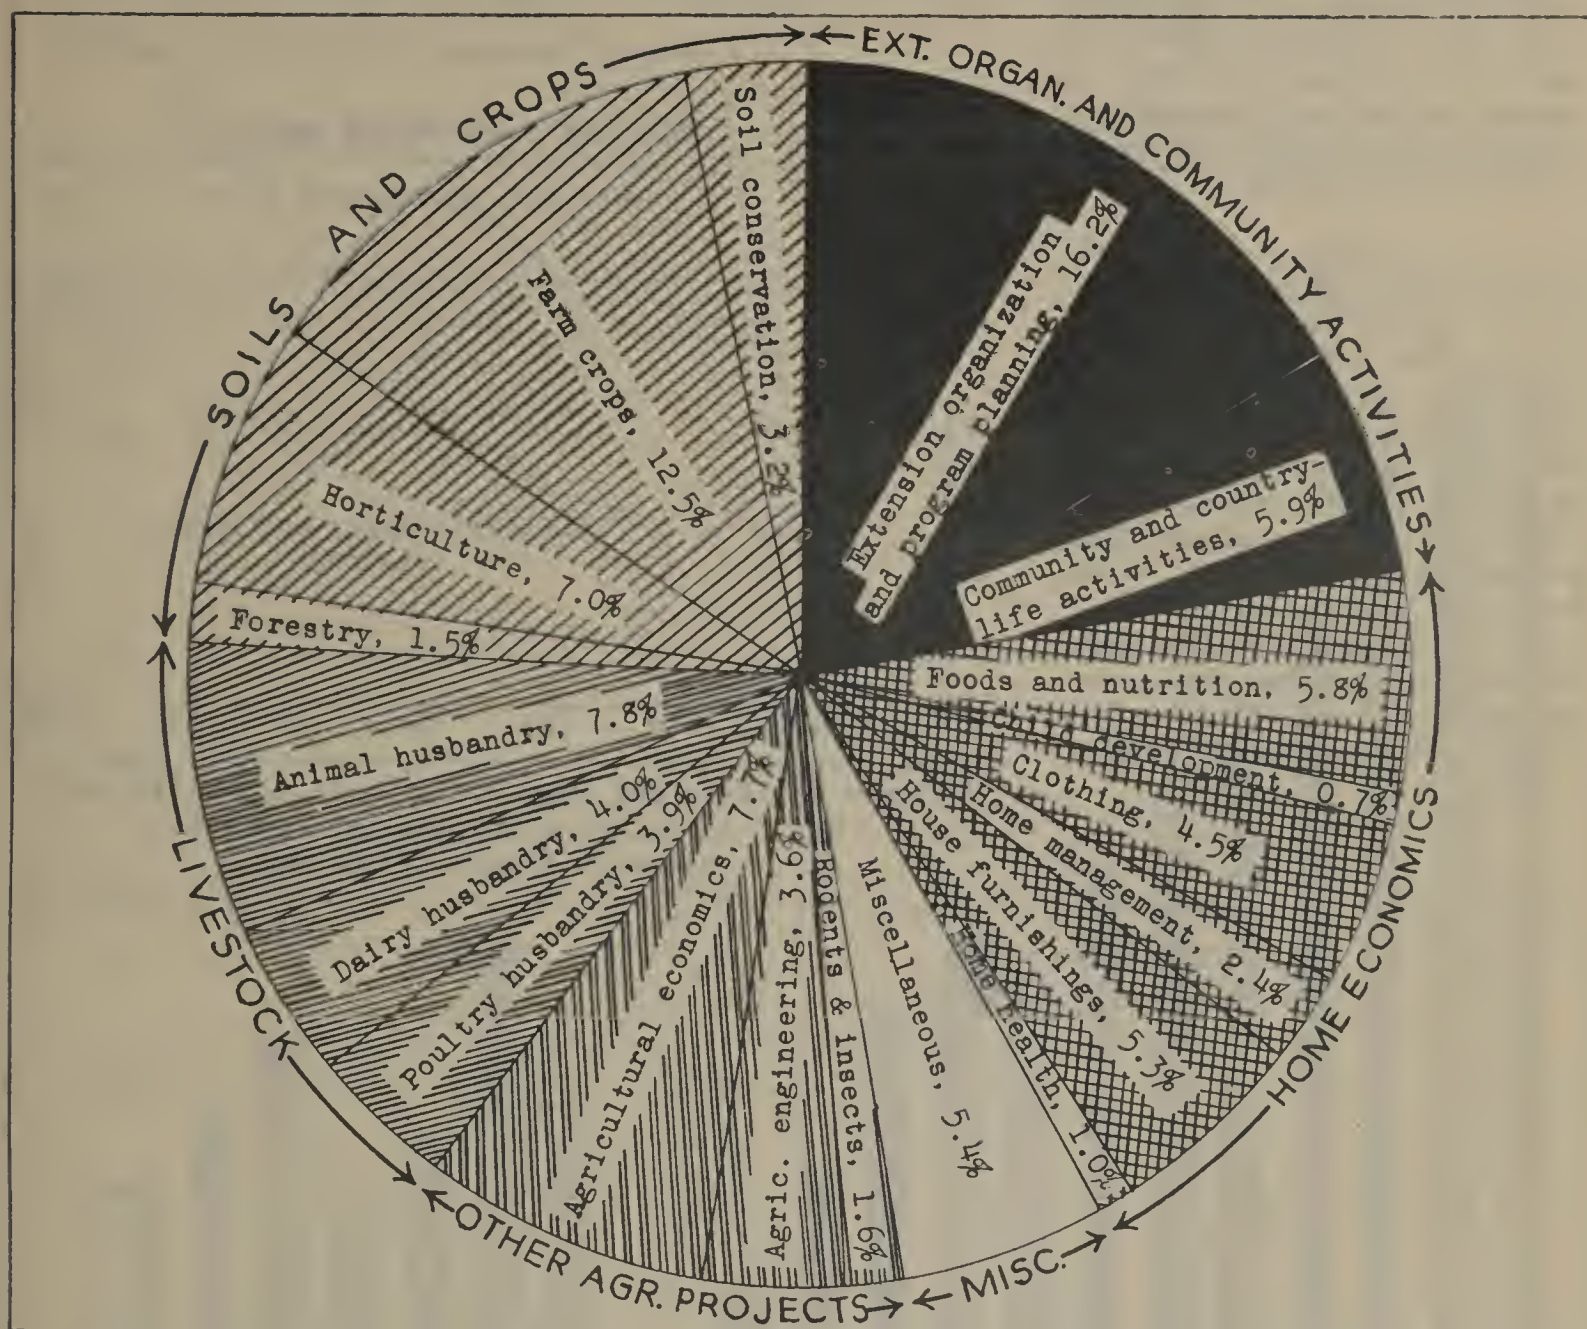

Figure 5.--The extension program for 1940. Percentage of time devoted to enterprises. (County extension workers plus field time of specialists)

The slight changes in program emphasis in 1940 as compared to earlier years are indicated in table 2. Slightly less time was devoted to agricultural economics and extension organization and program planning than during 1939. The teaching of low-income families to make their own mattresses doubtless explains the sharp rise in amount of time devoted to house furnishing.

## PERSONAL CONTACTS

During 1940, county extension agents made a total of 3,250,705 calls at 1,706,185 different farms and homes. Except for the years 1933-35, the volume of personal visits to farms and homes has increased steadily since 1923.

The number of personal calls at the county extension office during 1940 to confer with agents was approximately six times the number of calls made by agents to farm homes. The great up-surge in numbers of office and telephone calls began in 1933 and reached its greatest height in 1935. The number of office calls tends to increase sharply with each new Federal program for agriculture and to fall off as the programs become established.

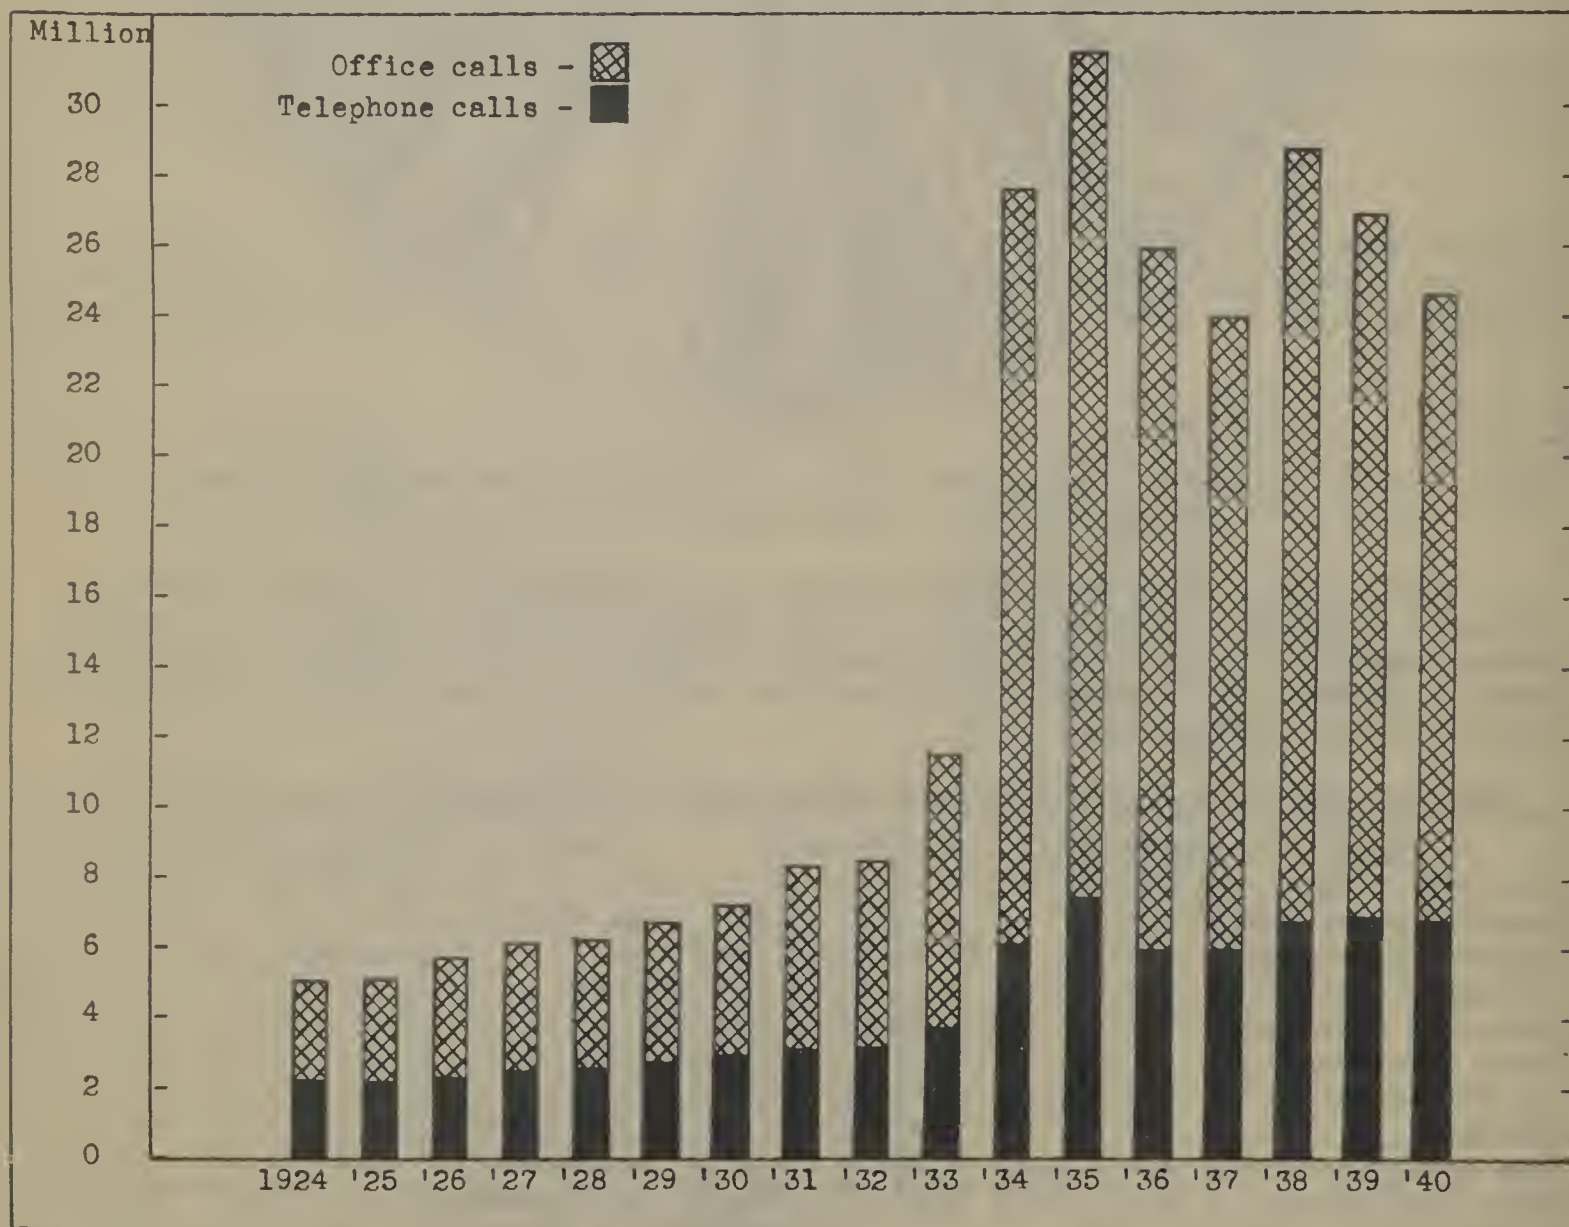

Figure 7.--Office and telephone calls received by county extension agents, 1924-1940

## EXTENSION MEETINGS

The total attendance at all meetings held by extension agents during 1940 was 46,369,976. In addition, meetings held by voluntary local leaders, with no extension agent present, drew an attendance of 12,301,885 persons. This makes a grand total attendance of 58,671,861 persons (figure 1).

Growth in numbers of rural people in attendance at meetings conducted by the extension service has been continuous since 1923 with the single exception of 1933 when a slight loss in attendance took place.

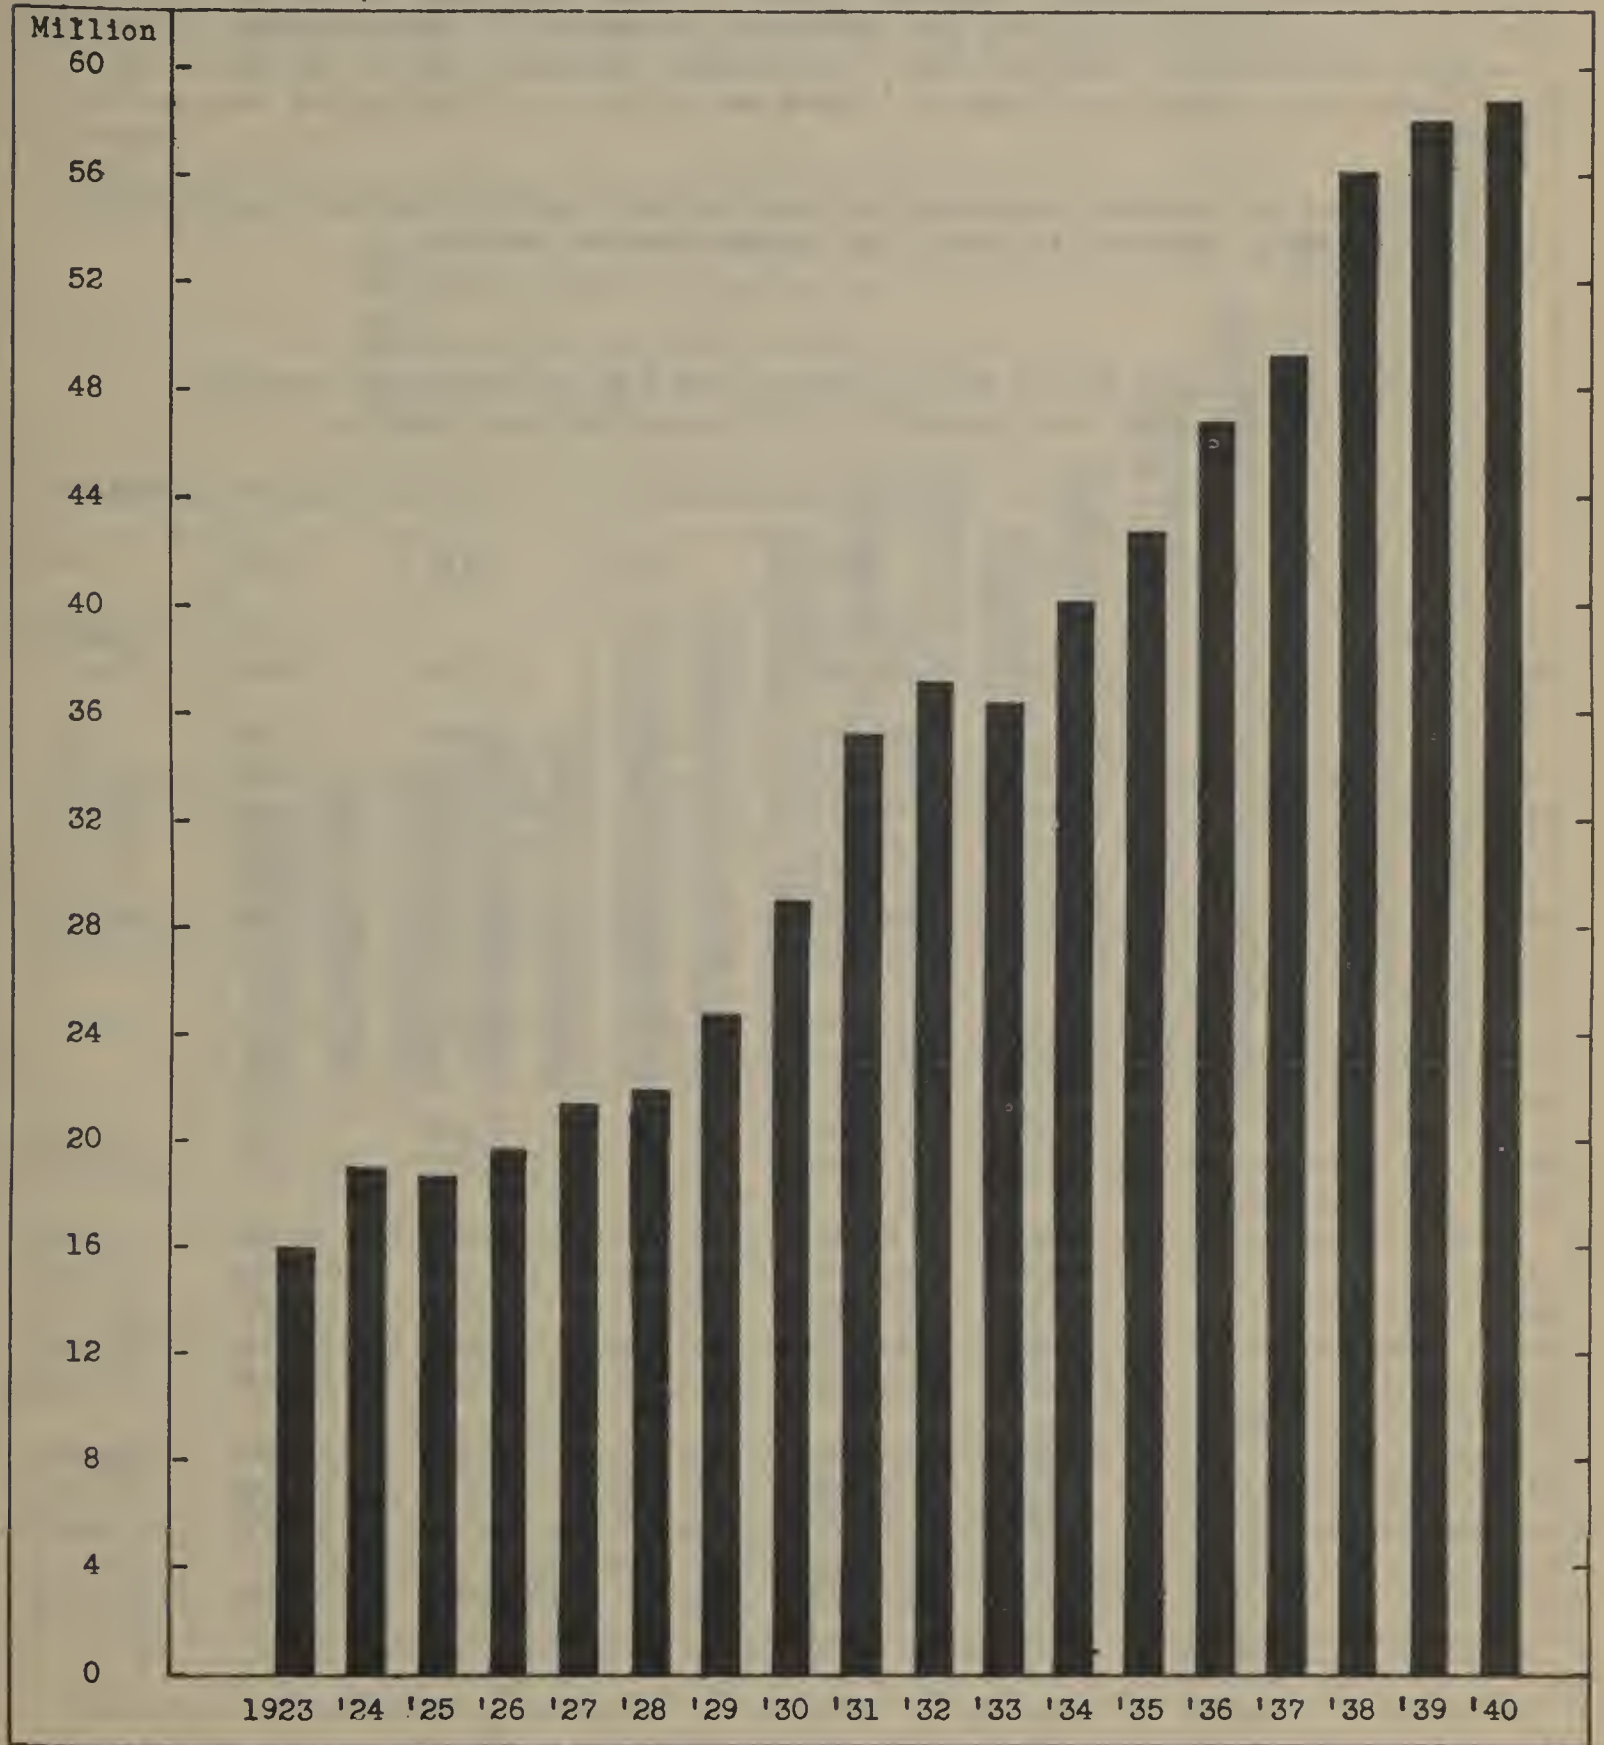

Figure 8.--Total attendance at all extension meetings held, 1923-1940 (Includes attendance at meetings held by local leaders at which extension agents were not present)

### Result Demonstrations and 4-H Projects

The number of result demonstrations conducted by farmers and rural homemakers during 1940 was 695,704 as compared to 720,187 in 1939 and 767,714 in 1938. The increases in soil conservation, cereals, legumes, forestry, home management and house furnishings were more than counterbalanced by the decreases in numbers of demonstrations relating to other subject-matter lines of work. The largest decreases were in potatoes and cotton, animal husbandry, rodents and insects, foods and nutrition, clothing and home health. (Table 3)

The number of projects completed by boys and girls in 4-H Club work during 1940 made a substantial increase in nearly all subject-matter projects.

# VOLUNTARY LOCAL LEADERS

The extent to which leading farmers, rural women, and older youth contribute their time and talents to advancing the extension program in agriculture and home economics is undoubtedly one of the best indices of extension progress. During 1940 the number of such unpaid local leaders assisting with all phases of cooperative extension work was 702,069. Of that number 261,536 were men leaders of adult work; 285,991 were women leaders of adult work; and 154,542 were men, women, and youth leaders of 4-H Club work.

# 4-H CLUB WORK

The enrollment of rural boys and girls in 4-H Club work reached an all-time high of 1,420,297 during 1940. Enrollment was 38,702 and completions 31,319 larger in 1940 than in 1939. The number of projects completed by 4-H Club members was 85,496 larger than during the year previous.

Three out of every four boys and girls enrolling in 4-H work completed the project work outlined for the year. Improvement over the years in the percentage of boys and girls carrying their club projects to completion is portrayed in figure 10.

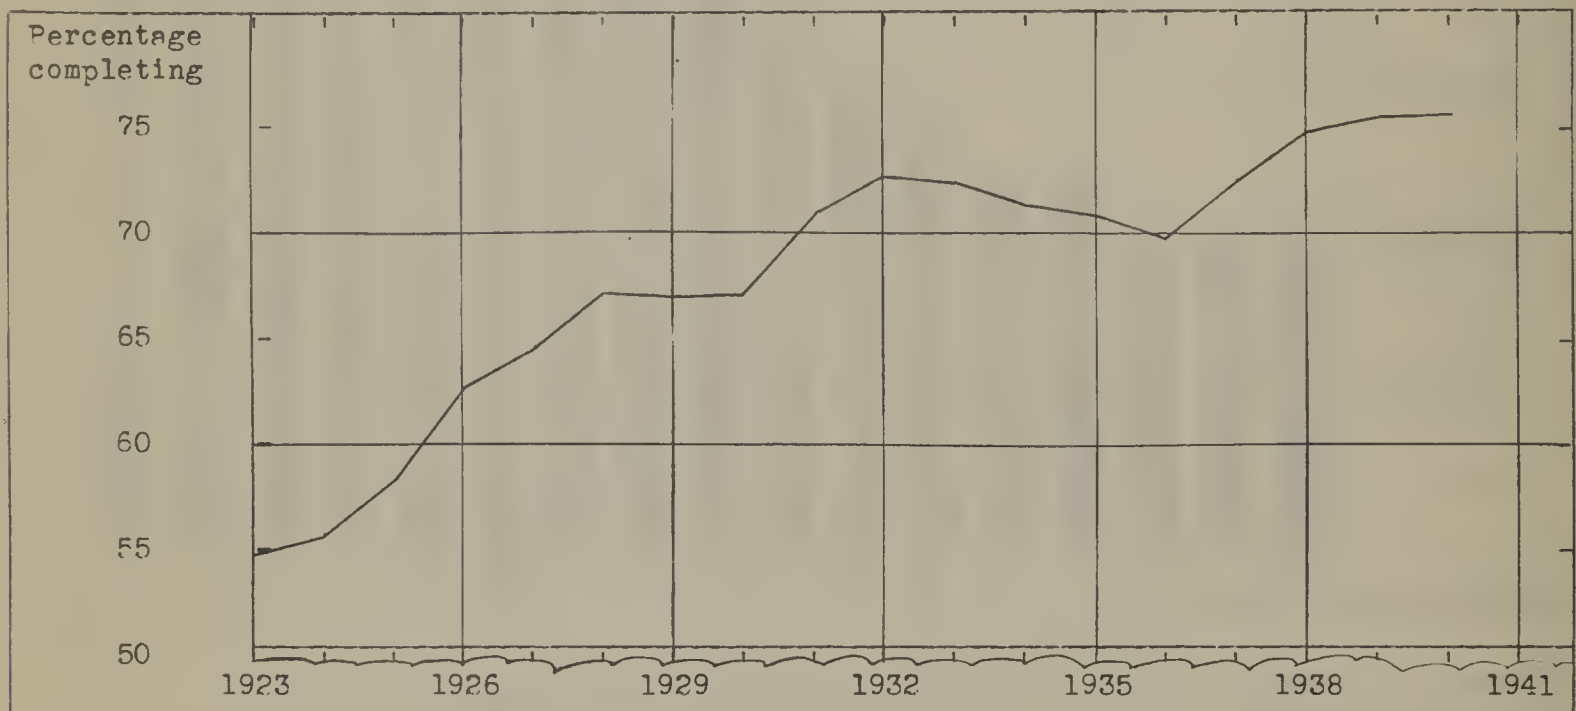

Figure 10.--Percentage of 4-H Club members completing their project work, 1923-40

Boys and girls are remaining in club work somewhat longer than formerly. The 1940 members averaged to have been in the work 2.38 years as compared to 2.31 years for 1939 members. Twenty and seventeen-hundredths percent of the 1940 members had been in club work for 4 or more years. The corresponding percentage figure for 1939 was 18.63 percent.

Table 6a.--Membership in 4-H Clubs according to length of time in club work

Group	Percentage of club members enrolled for					
	One year	Two years	Three years	Four years	Five years	Six years and over

Total .....	38.27	24.96	16.60	9.93	5.46	4.78

The age distribution of 1940 club members followed the 1939 pattern closely. Since the percentage of club members 16 years of age and older is slightly lower than in 1939, the increased length of participation in club work would appear to be the result of enrollment at a younger age rather than to any lessening of the tendency of boys and girls to drop out when they become 15 or 16 years of age. The percentage of club members who are out of school was 6 percent of the 1940 enrollment. This proportion has not changed in recent years.

The number of new members entering the 4-H Club ranks during 1940 was 543,503 boys and girls, making a grand total of 8,600,000 rural boys and girls who have participated in 4-H Club work since the passage of the Smith-Lever Extension Law in 1914.

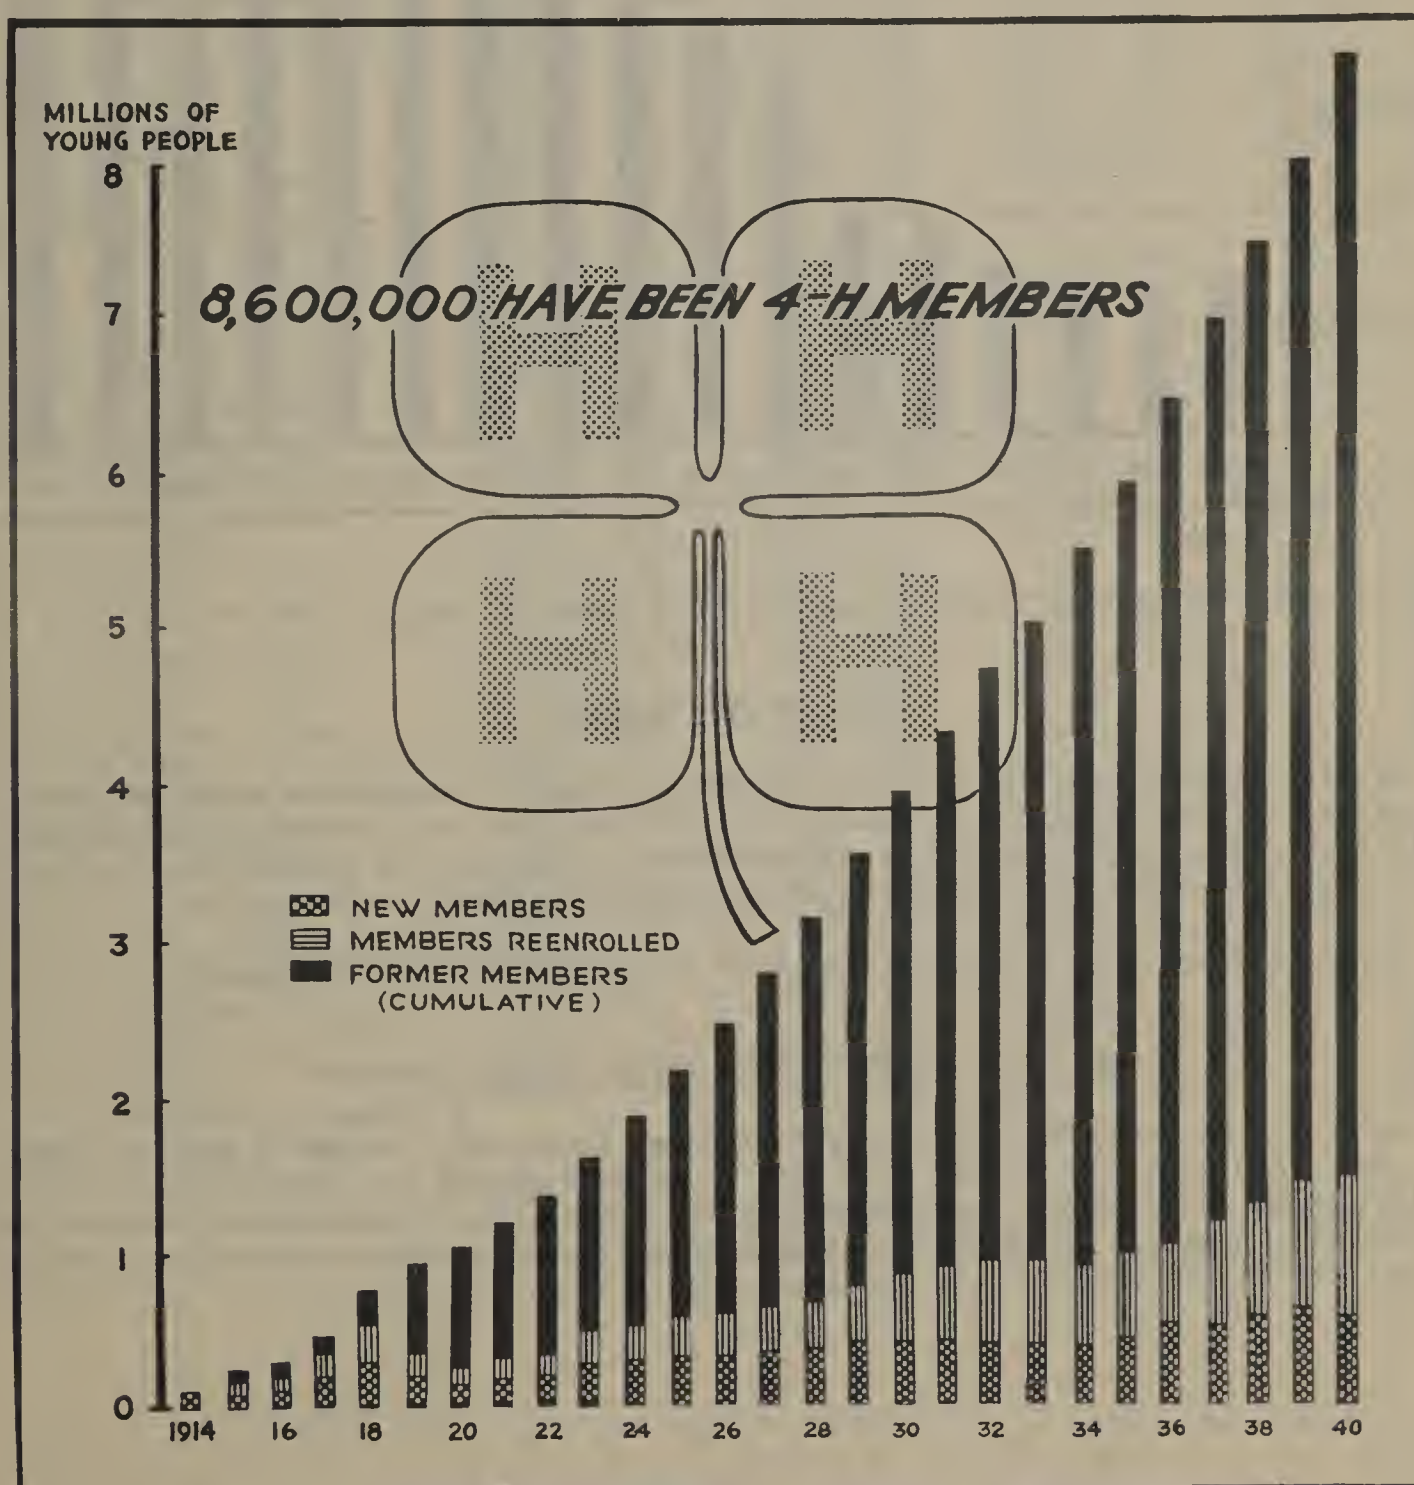

Figure 11.--Membership in 4-H Clubs, 1914-40

## EXTENSION WORK WITH OLDER YOUTH

A slight loss occurred in the number of young people 16-25 years of age not in 4-H Clubs who participated in organized extension groups. During 1940, 70,496 young people belonged to special extension groups as compared to 71,701 the previous year.

## MEMBERSHIP IN HOME DEMONSTRATION CLUBS

Membership in home demonstration clubs or groups increased from 1,118,519 women in 1939 to 1,140,723 in 1940. Two thousand four hundred and fifty counties reported a total of 51,101 home demonstration clubs or groups organized in 1940 in contrast to 47,812 such clubs or groups in 2,404 counties in 1939. Growth in home demonstration membership from 1924 to 1940 is portrayed in figure 12.

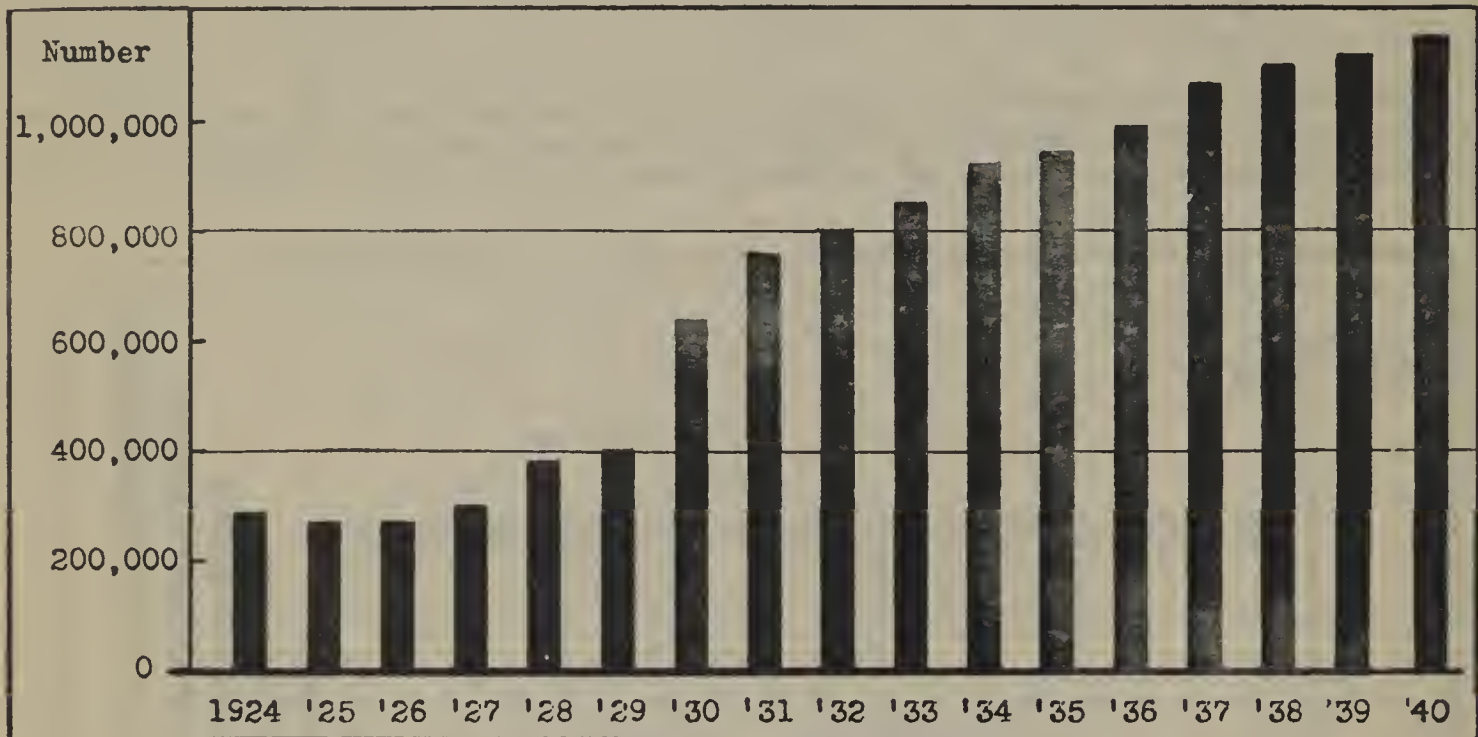

Figure 12.--Membership in home demonstration clubs or groups, 1924-40

## STATISTICAL SUMMARY

Detailed statistical information regarding extension activities and accomplishments during the year is listed in tables 7 to 13. Much of the information on general activities is given separately for home demonstration agents, 4-H Club agents, and agricultural agents (table 7). In the case of projects only totals are given.

A complete summary of all 4-H Club work is given in table 14, page 22.

## WORK IN COOPERATION WITH OTHER FEDERAL AGENCIES

Under the heading, "Cooperation with Federal Agencies", (tables 8 and 13, pages 14, 15, 16, and 21) an attempt has been made to bring together all work done by county extension agents in advancing the programs of the A.A.A., Soil Conservation Service, and other Federal agencies. Where the programs of these agencies coincide with extension projects there is, of course, some duplicate reporting.
